Code: 9702B
Pages: 196
Price: Rs. 1,200.00 US\$ 48.00

Publisher: Unicorn Books
Usually ships within 5 days

Birds are the most fascinating creatures on our earth. They have figured prominently in human art and literature, since time immemorial. But more recently, bird-watching has become a widespread favourite pastime, and even a serious occupation in most of the countries.

As a result, many popular books on birds have appeared, but most of these concentrate on the external appearance of the birds and are devoted to a description of the species that are found in a particular region of the world.

In the present volume, birds are not treated as mere museum specimens or subjects, simply to be identified and categorized, but they have been portrayed and presented as living creatures.

'Life Cycle of Birds' is, therefore, the first earnest endeavour of its kind to bring out a comprehensive volume showing the birdlife in its various growing phases right from the stage of nest-building to the successful departure of the young through clear, crisp and sharp colour photographs, which depict these wonderful winged creatures in their natural habitats and true-to-life postures.

Contents
